RESULTS

Configure inputs on the left and hit Calculate.

1. Overview

The Calculator tab is the primary tool for computing single-employee payroll tax adjustments. It supports Net Pay and Gross Up modes, auto-populates state-specific taxes, generates a compliance-ready CSV export, and produces a copy-ready CS Tools Summary for ticket resolution.

Page 1/4

Key Features

- Net Pay mode: enter gross, see taxes and resulting net
- Gross Up mode: enter desired net, tool finds the required gross
- Auto-populated state taxes when you select a state
- SUI wage base auto-applied for employer unemployment taxes
- Custom write-in tax rows with manual codes and rates
- CSV export with all tax lines (Clearing/Credit + Company/Debit)
- CS Tools Summary with clickable link and breakdown table
- Three ticket types: MDV, MISC Fully Taxable, and generic

2. Input Configuration

Tax Year & YTD Wages

Tax Year: Select 2023-2026. Determines SS wage base and SUI wage bases.

YTD Medicare Wages: Enter the employee's year-to-date wages. Used for:

- Social Security cap calculation
- Additional Medicare threshold (\$200k)
- SUI/FUTA wage base remaining room

Mode & Amount

Net Pay (enter gross): You provide the gross adjustment amount. The tool calculates all taxes and shows the resulting net pay.

Gross Up (enter desired net): You provide the target net amount. The tool uses binary search to find the gross that yields that exact net.

Additional Tax Rates

Employee Withholdings: Add state/local taxes from a dropdown of all known tax descriptions, or use 'Write in custom' for unlisted taxes. Each row has:

- Tax Name (dropdown or custom text)
- Tax Code (auto-filled from lookup, or manual entry)
- Rate (%) - editable
- Limit (Yes/No) - when Yes, shows YTD and Limit fields for wage base capping

Employer Contributions: Same interface for employer-side taxes (SUI, FUTA, etc.). SUI wage bases auto-populate when you select a state.

3. Adjustment Info & Results

Adjustment Info

MID: Member ID for the employee.

CID: Company ID.

Adjustment Date: Defaults to next Friday. Used in CSV export.

Ticket Type: MDV, MISC Fully Taxable, or blank (generic).

State: Auto-populates employee and employer tax rows.

Notes: Free text included in CSV reference field.

Results Panel

After clicking Calculate:

- Breakdown table: Gross -> taxes -> Net Pay
- Tax Detail table: every tax line with code, YTD, taxable, amount
- Metric cards: Total Tax, Effective Rate, Net Pay
- SS wage base callout (when partially or fully capped)

CSV Export

Generates a downloadable CSV with:

- One Clearing/Credit row per tax (employee + employer)
- One Company/Debit row summing all credits
- 15 standard columns matching the payroll system format
- Filename: {MID} {CID} {TicketType}.csv

4. CS Tools Summary

After CSV export, a CS Tools Summary section appears. This generates copy-ready HTML for pasting into CS Tools tickets.

MDV Ticket Type

Shows:

- CS Tools Link input (makes header clickable)
- Debit Date input
- Summary paragraph: adjustment link, debit amount, debit date, net pay
- Breakdown table: Gross -> taxes -> Net
- SOP link for refunding benefit deductions
- Team page link
- Copy Summary to Clipboard button

MISC Fully Taxable

Shows:

- CS Tools Link input
- Debit Date input
- Summary: ADJ link header, employer debit amount and date
- Breakdown table
- Copy Summary to Clipboard button

Generic (Other Ticket Types)

Shows:

- CS Tools Link input
- Debit Date input
- Summary: adjustment link, debit amount, debit date
- Breakdown table
- Copy Summary to Clipboard button

5. Step-by-Step Workflow

1. Select Tax Year (affects wage bases and SUI limits)
2. Enter YTD Medicare Wages if known (for accurate SS capping)
3. Choose Mode: Net Pay or Gross Up
4. Enter the amount (gross or desired net)
5. Fill in MID, CID, Adjustment Date on the right
6. Select Ticket Type and State
7. Review auto-populated tax rows - adjust rates as needed
8. Add any custom taxes via '+ Add Employee/Employer Tax'
9. Click Calculate to see results
10. Download CSV export
11. Fill CS Tools Link and Debit Date
12. Click 'Copy Summary to Clipboard' and paste into CS Tools ticket
