Gross	Social Security	Medicare	FUTA	YTD through Q1
Gross Wages (\$)	SS Wages: \$0.00	Medicare Wages: \$0.00	FUTA Wages: \$0.00	Gross Wages: \$0.00
0.00	SS Tax: \$0.00	Medicare Tax: \$0.00	FUTA Tax: \$0.00	Social Security (limit \$184,500)
				SS Wages: \$0.00
				SS Tax: \$0.00
				Medicare
				Med Wages: \$0.00

1. Overview

The FICA Debit tab generates CSV exports for collecting under-withheld FICA taxes (Social Security, Medicare, and FUTA) across one or more quarters. It creates Clearing/Credit rows for each tax type and matching Member/Debit and Company/Debit rows to charge the employee and increase the employer liability.

When to Use

- Employee was under-withheld for Social Security
- Medicare was under-collected and needs to be charged
- FUTA was missed or under-calculated
- Quarterly corrections to increase FICA withholding

2. Input Fields

Global Fields

Member ID: The employee's MID (M-prefix).

Company ID: The CID for the company.

Tax Year: Determines quarter end dates and wage bases.

Per-Quarter Data

Each quarter (Q1-Q4) has an expandable section with:

Gross: The taxable gross amount for this quarter's correction.

Social Security:

- SS Tax (\$): Auto-calculated at 6.2% of gross, editable

Medicare:

- Medicare Tax (\$): Auto-calculated at 1.45% of gross, editable

FUTA:

- FUTA Tax (\$): Auto-calculated at 0.6% of gross, editable

Adjustment Date: Defaults to quarter end date (adjusted for weekends). Editable.

Validation

Same validation as FICA Refund - warns when entered amounts don't match expected rates. Override if the variance is intentional (e.g., partial-quarter correction or wage base capping).

3. CSV Output

Row Structure (per quarter)

For each quarter with data, the tool generates:

1. Clearing/Credit - 00-403 (SS Employee): charge SS tax
2. Clearing/Credit - 00-404 (SS Employer): charge SS tax
3. Clearing/Credit - 00-406 (Medicare Employee): charge Medicare tax
4. Clearing/Credit - 00-407 (Medicare Employer): charge Medicare tax
5. Clearing/Credit - 00-402 (FUTA): charge FUTA tax (if applicable)
6. Member/Debit: sum of employee taxes charged to employee
7. Company/Debit: sum of all taxes (including employer) charged to company

Download

Preview the full CSV in a dataframe before downloading. Filename: {MID} {CID} FICA Debit.csv

Missing MID or CID triggers an error prompting you to fill them in.

4. Step-by-Step Workflow

1. Enter Member ID, Company ID, and select Tax Year
2. In each relevant quarter, enter the Gross amount
3. Review auto-calculated tax amounts (adjust if needed)
4. Verify adjustment dates (default to quarter-end, weekday-adjusted)
5. Check validation warnings - dismiss or fix
6. Add notes if needed
7. Preview the CSV in the export section
8. Download the CSV file
